

QUENTIN LHOMMEAU

Final-year internship — Maritime Engineering | Shipbuilding | Offshore | Maritime transport

✉ quentin.lhommeau@hotmail.fr

📍 Toulon, France

🌐 quentin-lhommeau-22500527b

🌐 <https://quentoche8-edu.github.io/quentin-lhommeau-portfolio/>

🚗 Driving licence B, coastal navigation licence

Engineering student in maritime engineering (SeaTech, Toulon), specialized in hydrodynamics, fluid mechanics and fluid-structure interaction. Experience in numerical modeling and simulation applied to coastal structures and offshore engineering. I am seeking a 6-month final-year internship in shipbuilding, offshore infrastructure or maritime transport.

Maritime engineering

Naval engineering

Shipbuilding

Hydrodynamics

Numerical simulation

Offshore structures

Marine renewable energies

Coastal infrastructures

Project management

Naval architecture

PROFESSIONAL EXPERIENCE

Engineering intern – Coastal hydrodynamics & numerical modeling

IHCantabria

📅 May to August 2026

📍 Santander, Spain

- Adaptation of EUROTOP equations to breakwaters under construction to better assess their vulnerability to wave overtopping.
- CFD simulations of breakwaters with IH2VOF and proposal of an index and calculation method for breakwaters under construction.

Workshop assistant in a sail loft

Incidences Sails

📅 July 2025

📍 La Farlède, France

- Cutting and assembly of boat sails in a production team.
- Repair of sails and installation of sails for customers.

Restaurant server

La Taverne Ruaudin, Renaud traiteur, Belambra club

📅 Multiple seasons (2021 – 2025)

📍 Le Mans and Hyères, France

Various roles as server/runner in restaurants and holiday clubs: service management, customer relations, teamwork under pressure.

PROJECTS

Understanding surfing practice through the physics of wave breaking

SeaTech Engineering School

📅 2026

📍 Toulon, France

- Modeling of dissipated energy during wave breaking using the Ruessink model and comparison with wave basin measurements.

Study of an offshore hybrid farm (SubSea7)

SeaTech Engineering School

📅 2025

📍 Toulon, France

- Study with SubSea7 of a hybrid offshore wind-solar farm in the South China Sea: technical, economic and environmental feasibility.

EDUCATION

Engineering school – Maritime Engineering specialization

SeaTech

📅 2024 – 2027

📍 Toulon, France

Fluid-structure interaction, hydrodynamic corrosion, sedimentation, oceanography, naval architecture, strength of materials, marine renewable energies, management, project management, business administration, environmental regulation.

Preparatory class (PSI)

Lycée Montesquieu

📅 2022 – 2024

📍 Le Mans, France

Scientific Baccalaureate (with distinction)

Lycée Touchard

📅 2019 – 2022

📍 Le Mans, France

LANGUAGES

- French : native language
- English : professional level, TOEIC 905
- Spanish : basic level

TECHNICAL SKILLS

- Programming : Python, SQL, MATLAB, C
- Modeling and CFD simulation : Croco, Deepline, Diodore, SolidWorks, Rhino, IH2VOF, SWAN, XBeach, SWASH, Abaqus
- Office and digital tools : Microsoft Office, GitHub, Git, Bash, LaTeX, Photoshop, Notion

INTERESTS

Sports : running (10 years), windsurfing;
culture : guitar, singing, sewing, electronics and repair.
